

The Company

PayPal has been revolutionizing commerce globally for more than 25 years. Creating innovative experiences that make moving money, selling, and shopping simple, personalized, and secure, PayPal empowers consumers and businesses in approximately 200 markets to join and thrive in the global economy.

We operate a global, two-sided network at scale that connects hundreds of millions of merchants and consumers. We help merchants and consumers connect, transact, and complete payments, whether they are online or in person. PayPal is more than a connection to third-party payment networks. We provide proprietary payment solutions accepted by merchants that enable the completion of payments on our platform on behalf of our customers.

We offer our customers the flexibility to use their accounts to purchase and receive payments for goods and services, as well as the ability to transfer and withdraw funds. We enable consumers to exchange funds more safely with merchants using a variety of funding sources, which may include a bank account, a PayPal or Venmo account balance, PayPal and Venmo branded credit products, a credit card, a debit card, certain cryptocurrencies, or other stored value products such as gift cards, and eligible credit card rewards. Our PayPal, Venmo, and Xoom products also make it safer and simpler for friends and family to transfer funds to each other. We offer merchants an end-to-end payments solution that provides authorization and settlement capabilities, as well as instant access to funds and payouts. We also help merchants connect with their customers, process exchanges and returns, and manage risk. We enable consumers to engage in cross-border shopping and merchants to extend their global reach while reducing the complexity and friction involved in enabling cross-border trade.

Our beliefs are the foundation for how we conduct business every day. We live each day guided by our core values of Inclusion, Innovation, Collaboration, and Wellness. Together, our values ensure that we work together as one global team with our customers at the center of everything we do – and they push us to ensure we take care of ourselves, each other, and our communities.

Job Description Summary:

Sr Data Governance Analyst you will have the opportunity to define the enterprise-wide data governance strategy, frameworks, processes, standards, procedures and performance measurements for data quality, master data, metadata data, stewardship & accountability, data reg compliance, data risk management and data lifecycle management. The role will also drive governance technology capability requirements and guidelines for the company. Given the criticality of data quality, this role is essential to building out PayPal's Global Data Governance and Management program. This position will drive significant collaboration across all business areas within PayPal and its adjacencies. This will be a Hybrid role - (San Jose, Austin, Chicago, Scottsdale). The Employee must commute to office based on the RTO requirements.

Job Description:

In your day-to-day role, you will:

- Own definition and implementation of the data governance strategy and control framework across PayPal organization (includes data quality, data lifecycle, master data, reference data, metadata data, accountability and stewardship, and external data acquisition)
- Define framework for governing data and data management activities for both "Cloud" and "on-premise" data ecosystems
- Operate as a change agent across PayPal, guiding and directing various data governance & management activities, focusing on advancing the maturity of data management within the company
- Ideate and devise governance processes that currently do not exist and enhance existing ones to bring into alignment with industry trends and best practices.
- Drive infusion of Artificial Intelligence and Machine Learning in creating delightful and intelligent data governance capabilities that enable data quality, metadata search and discovery, data destruction and data lifecycle management
- Incorporate advance technology to measure and report performance against data governance KPIs and KRIs
- Create impactful and substantive relationships across the company and ensure business and technology partners are aligned to the data strategy
- Educate and train business and technical data stakeholders across all business areas to understand PayPal's Data Governance strategy, framework, policy, procedures and practices
- Coordinate data related activities of business and technical stewards across the company
- Work with stewards and data practitioners across the company to ensure all data governance processes, including quality, data destruction, critical data management and data privacy are integrated into product development, engineering, analytics, reporting, etc.
- Lead cross-functional Data Governance forums and working groups, including Data Stewardship Council, Data Quality Working Group, Enterprise Data Council, Change Communication Board
- Constantly review existing governance processes and practices to identify and implement opportunities for automation, adoption, and business value achievement

What You Need To Bring

- 10- 15 years of experience in Data management.
- Experience with data management and data governance tools such as Collibra & Datahub is a plus
- BS degree in Engineering, Computer Science, Statistics, Business or related field Or MS
- Industry certifications (CDMP) in data management or related fields are a plus.
- Executive Presence
- Collaborating, Partnering, & Influencing Stakeholders
- Data Management Discipline
- Pro-active management, leadership, and communication
- Analyzing of complex, voluminous data

- AI/ML experience that may include:
 - AI/ML Governance Strategy & Controls Framework
 - Machine Learning for Governance processes
 - Cloud Governance Framework & Process Definition
- 5-8 years of program management and project management experience
- Experience with industry data quality platforms and tools
- Strong communication skills with a proven ability to work across multiple organizations to accomplish diverse goals
- Must have a high degree of expertise in data management-understanding of how all facets of data management are integrated to provide best value
- Excellent verbal and written communication and collaboration skills to effectively communicate with both business and technical development teams
- Comfortable working in a fast-paced, results-oriented environment
- Familiarity with the trends and opportunities in the data quality-data management industry
- Able to see the "big picture"-the end-to-end connection points associated with data and systems.

PayPal is committed to fair and equitable compensation practices.
