SKILLS

• Python • SQL • AWS • Databricks • Data Governance • Regulatory Compliance (GDPR, CCPA) • Audit Security • Process Automation • Metadata Management (Alation)

PROFESSIONAL EXPERIENCE

Sr. Analyst | Data Engineering Governance April 2022 - Present

United Airlines, Chicago, IL

- Managed access controls within AWS, overseeing 1000+ groups across environments, enhancing security and data governance
- Developed Data Governance auditing tool using Microsoft Graph API to monitor AD groups, audit queries, and automate communications
- Implemented data lineage solution mapping upstream/downstream objects, improving visibility and governance practices
- Participated in multiple regulatory compliance frameworks (GDPR, CCPA) and SOX audits, ensuring adherence to evolving standards
- Utilized Python and Alation API to automate logical metadata uploads, improving data discoverability across the organization
- Led development of comprehensive documentation capturing institutional knowledge and improving team resilience
- Coordinated with outside counsel to ensure data protection compliance with legal and regulatory requirements

Research Data Analyst August 2018 – April 2022

Rush University, Chicago, IL

- Analyzed large datasets (>140M records) using statistical methods to derive actionable metrics
- Built data pipelines to speed up storage, analysis and modeling processes
- Created visualization tools including geographic heat maps in R to inform targeted strategies
- Designed and implemented automated reporting systems to identify anomalies and streamline workflows
- Leveraged Python and R for demographic analyses informing business decisions and improving outcomes

EDUCATION

University of Illinois B.S.

2014-2018
